

REMARKS

Paragraph [0001] to [0000] correction under Related Application was necessitated by a typographical error that resulted in a duplicate [0001] paragraph under Field of the Invention. No new matter was added.

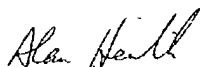

Correction at [0082] 12. was necessitated by a lacking word reference source. "3-11" was added. Support for this may be found in the provisional application (page 20 step 11) where steps 2-10 are noted. Between the provisional and this application an additional step was added in front and so the provisional 2-10 is now the renumbered non-provisional 3-11.

Respectfully submitted,

Alan Heimlich / Reg 48808
